Subject: Crack M\$'s monopoly

Hello,
I believe "American Law & Justice" must be blind and deaf ...
... or there is a big corruption by its political elite in the
case of Microsoft ;-(

In my eyes: M\$ plays a very tricky game ...
... not paying respect to their customers nor the law.
Not only this: As a monopolist it cheats and maltreats its
customers.
They do not fulfil their obligations to customers needs ...
... they are caring their own cashcow and hide bugs and errors.

They are placing "Roadblockers" to get their case running into
hell ...
... if this happens: we'll have hell on earth: M\$ = the biggest
IT dictator
affecting the every business around the whole earth !

A product having a market share more than 51% needs special
observation
including its companies practices !
A company having a product with a market share more than 66 %
needs a
mandatory break into independent (NO management buyouts) smaller
units !!

America and the world is fighting against terrorism ...
... M\$'s monopoly is a kind of terrorism too: a FATAL economic
terror:

They have killed so many small but very good companies and
products ...
... not only but also its working places and many human
existencies.

Blue eyes are beautiful ...
... but being blue-eyed to M\$ is fatal for us all !!

Mister B. G. may be a brave boy and son of his parents ...
... together with his company's gang he is a wolve in sheep fur
;-(

FINE it PAINFULL with a sensitive very big money by CASH !
CRACK it into minimum 3 companies like:

1) Operating Systems
2) Application Software
3) Services (ASP, ISP and Joints like Telecom, and others) ...
... these could / should be cracked in perhaps more than only one
unit !

DO it ASAP ...
... stop the M\$ GAME ...
... before justice and law become unbelievable and loses its
power against M\$
in its worldwide cheaty, tricky monopoly game !!!

Kind regards and good luck
